[Additional Skills]

EXPERIENCE

KiwiCo Inc. | Mountain View, CA

● Product Designer

[March 2024 - January 2025]

- Spearheaded the design of wooden and plastic toys fostering STEM/STEAM learning for preschool age group
- Owned full product development process from initial concept brainstorming to final production
- Communicated with manufacturers daily to problem solve production and safety testing hurdles
- Play tested products to ensure age-appropriateness and gain insights on how to improve play value
- Pitched concepts and presented product updates weekly to executives

● Associate Product Designer

[September 2022 - March 2024]

- Defined visual language and drove development for a set of products promoting early science for 3-6 year olds
- Led and grew the company's product collection fostering early math for 3-6 year olds
- Acquired leadership of product development for the company's 0-24 month old subscription line

● Junior Product Designer

[October 2021 - September 2022]

- Designed and collaborated on the development of educational toys for 0-24 month olds
- Applied knowledge of child development milestones to drive concept and design of products
- Assisted and supported the design team with 3D modeling and file modifications

ZagSports Tours | Philadelphia, PA

Chief Storyteller

[April 2020 - June 2021]

- Led and designed packaging for children's book subscription boxes
- Developed activities to help foster childhood development
- Sketched storyboards for video and animation clips

Drexel University Westphal College of Art & Design | Philadelphia, PA

Hybrid Lab Monitor

[September 2018 - June 2021]

- Maintained lab machinery such as laser cutters, 3D printers, and other tools
- Monitored student activities in the lab and provide assistance when needed
- Facilitated best practices in fabrication and design for students and faculty

PROJECTS

KiwiCo Inc. | Mountain View, CA

Wind Play Lab

[July 2023 - August 2024]

- Led and owned product development of a play set for 3-6 year olds to experiment and learn about air, wind, and flight
- Problem solved and worked with manufacturers to improve air flow, function, and longevity of the internal fan
- Play tested to gain insights on play pattern, capabilities of little one's, and the enrichment value to refine the experience
